

Senior and Principal Contaminant Scientists

Melbourne

Environmental Earth Sciences is Australia's largest independent soil science consultancy, specialising in solutions for the Brown Environment, soil, groundwater and waste. We offer our clients complete solutions through our consultancy and contracting arms and are renowned for our professionalism, innovation and original thinking.

We are looking for a Senior and a Principal Contaminant Scientist with direct experience in contaminated land assessment and remediation. Applicants must also have a clear track record of developing new business and expanding existing accounts through excellent customer relationships.

You will have a degree or post graduate qualification in geology, soil science, hydrogeology or a related engineering discipline. Excellent communication, technical and project management skills are essential for success in this challenging role.

In return we offer an attractive remuneration package, commensurate with experience, in a dynamic firm with exciting career opportunities. If you are interested in working for an innovative scientific company and have a passion for the environment please forward a letter of application and curriculum vitae to the Human Resources Manager by email on hr@eesi.biz
